规格参数 Specification parameters

|                             |                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------|
| 直径 × 高度(Dimension × Height) | 26 × 24 MM × 13.45 MM                                                                                          |
| 材质(Material)                | 光学级PMMA(Grade PMMA)                                                                                            |
| 光束角度(Beam Angle)            | 15° × 45°                                                                                                      |
| 透光率(Lens Transmission)      | 93%                                                                                                            |
| 标准(CoD)                     | SGS/ROHS                                                                                                       |
| 适配光源(Matched LED)           | 2835/3030/3535/CREE-XPE                                                                                        |
| 适用于(Application)            | 广告灯箱侧发光、注塑模组、户外照明灯具等<br>For edge light advertising light box, plastic injection module, outdoor lighting lamp. |
| 产品优势(Product advantage)     | 外观大气, 光斑均匀, 对打距离长<br>Nice shape, uniform lighting which spreads long distance                                  |
